### DETAILED ACTION

1. This Office action is responsive to amendment filed 02/14/08.

#### *Double Patenting*

2. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

3. Claims 1-10 provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-24 of copending Application No. US 2005/0110755. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

US 2005/0110755 (claim 1)	US 2005/0110754
a pointing device,	a pointing device (claim 1)
a surface having a puck field of motion defined thereon	a moveable puck confined to move within a puck field of motion (claim 1)

a moveable puck comprising a user sensor that detects an interaction between a user and said puck, said puck being confined to move within said puck field of motion	the moveable puck includes a user sensor that detects the interaction of a user and said puck (claim 2)
a position detector that measures the position of said puck in said puck field of motion.	a position detector (18) that measures the position of said puck in said puck field of motion (claim 1)

***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claim 1 recites the limitation "said support sub-assembly" in line 12. There is insufficient antecedent basis for this limitation in the claim.
6. Applicant's arguments with respect to claims 1-10 have been considered but are moot in view of the new ground(s) of rejection.
